Flutter topic : Skill Swap

Skill Swap is a platform for innovative learning that allows users to exchange skills without the need for monetary transactions. The app connects individuals who want to learn a particular skill with those who can teach it, creating a collaborative and interactive learning environment

key features:
(1) Skill exchange matching: Users can list the skills they can offer and the skills they want to learn.

(2) User profile rating: Building a profile showcasing the expertise of the authentic user.

(3) Communication: Matched users can communicate to decide and schedule a session.

Use Cases:
(1) A guitarist teaching a designer in exchange of logo design skills.

(2) A French speaker learning coding from a developer

By providing a platform where knowledge is the currency, Skill Swap transforms the way people learn, share and grow new skills.
